About

- Over the past 9 years I have continuously challenged myself with new languages, frameworks and methodologies. My core languages have always been Java and JavaScript but I have also worked as a full stack application developer building small business applications. I'm a highly-motivated, fast learner and great team player.

SKILLS

- Hands on experience in developing web application using **JavaScript, ES2015, Angular1, React, Redux, Webpack, NPM, Grunt, Babel, SCSS, HTML, CSS** etc
- Solid understanding of **Core Java** concepts and **OOP** principle
- Strong software design and development experience in building **Java, J2EE, JSF** based applications
- In-depth knowledge of design patterns such as **MVC, Singleton, Decorator**, etc
- Expertise in major Java open source frameworks including **Struts, Spring**, and **Hibernate**
- Familiar with popular version control tools **Git** and **SVN**
- Prepared **SQL, Stored Procedure** using **SQL Server 2008, SQL Developer** or **MySQL**
- Followed strict coding standard and **Agile** software development methodology. Always have a passion for delivering **Clean, Complete** and **Robust** code
- Involved in all phases of **SDLC** ranging from planning, analysis, design, implementation, and maintenance

PROFESSIONAL EXPERIENCES

Numerix, LLC – Senior Software Engineer

09/2014 – present

I have been developing with React, Redux, Angular, JSF and Primefaces for the past 3 years in Numerix. I am currently working as a senior front end developer on a React team building Finance applications and I am across multiple applications that have been built or are being built using our new development stack. Our team are keen to utilize the latest front end technologies and we have had great success as a team using React/Redux running on a Node Express server and using an API backend architecture to access the various Numerix systems. We are striving to increase the quality of our projects with good test coverage and code reviews and improving our continuous integration practices.

Gartner, Inc. – Software Engineer

06/2013 – 09/2012

56 Top Gallant Road, Stamford, CT 06904

Developed, enhanced, and maintained enterprise application in **J2EE, JSP** and **JavaScript**. Involve in all aspect of SDLC of projects. Developed and maintained multiple web-based applications, including Donor Development, Goal Management & Success Factors, LLS Mobile, LLS main administration application etc. Well adapted to the fast pace development environment and collaborate closely with remote developer team from India and Russia.
